## A QUESTION ABOUT Brown's Iron Bitters ANSWERED.

The question has probably been asked thousands of times. "How can Brown's Iron Bitters cure everything?" Well, it decen't, But it does one any disease for which a reputable physician would prescribe IRON Physicians recognize Iron as the best restorative agent known to the profession, and inquiry of any leading chemical firm will substantiate the assection that there are more preparations of iron than of any other substance used in medicine. This shows concurred that the constitution is acknowledged to be the most important factor in successful medical practice. It is, however, a remarkable fact, that prior to the discovery of BROWN'S IRON (BITTERS no perfect yeatle factory iron combination had ever been found.) BROWN'S IRON BITTERS does not injure beadache, or produce constipation—all other iron medicines do. BROWN'S IRON BITTERS cures Indigestion, Billousness, Weakness, Dyspepsia, Malaria, Chilis and Fevers, Tired Feeling, General Debility, Paln is the Side, Back or Limbs, Headache and Neural-gin—for all these ailments Iron is prescribed daily. BROWN'S IRON BITTERS, however, does

DRUWN SINUR BILLENS, not onre in a minute. Like all other thorough medicines, it acte allowly. When taken by men the first symptom of benefit is renewed energy. The muscles then become fixmer, the digestion improves, the bowels are active. In somes the effect is neually more rapid and marked. The eyes begin at once to brighten; the skin clears up; healthy color comes to the cheeks; nervousness disappears; functional derangements become regular, and if a nursing mother, abundant sustenance is supplied for the child. Remember Brown's Iron Bitters is the QNLY iron medicine that is not injurious. Physicians and Pruggists recommend it. The Genuine has Trade Mark and crossed red lines on wrapper. TAKE NO OTHER.

### JOINED THE FIDELITY.

The Metropolitan National Goes Under ident and Vice President Arrested-Illstory of the Bank.

CINCINNATI, Feb. 7. - The Métropolitan bank has joined the Fidelity. The rumors regarding the bad

condition of the bank's affairs have been verified by its collapse. The temporary suspension of Monday morning was the beginning of the end. The other banks came nobly to the rescue. Eight of these agreed to and did furnish \$25,000 each to tide the bank over. The "runs" on the bank were successfully met.

Prospects looked bright. But at the clearing houses insurmountable difficulties were found. Checks to the amount of \$26,000 were presented against the Metropolitan, while that bank had but \$15,000 in checks on other banks. To make up the difference a check for \$15,000 was given on the First National thinking that it would be carried until the next day.

The First, however, presented it at the Metropolitan, and not receiving payment threw it back upon the cashier. The Ohio Valley then appeared with a hundle of checks upon the Metropolitan. Payment upon these was also refused, and W. D. Duble, manager of the clearing house, was notified. According to the rules of that institution all checks of the Metropolitan of that day had to go to

The banks interested held a conference, and they agreed to carry the checks over, and also to help in business. The Metropolitan officers were greatly relieved. But their hopes were soon rudely shattered.

About 6 p. m. Deputy United States Marshal Costello walked into the bank with a

warrant for the arrest of John R. De Camp, vice president of the Metrpolitan. This created the greatest confusion. Negotiations for the relief of the bank were declared off temporarily. De Camp, with the deputy close at hand, was striving to arrange matters and secure bond. People rumors, rushed into

JOHN R. DE CAMP. the bank. The warrant charges that John R. De Camp, as vice president and director of the Metropolitan National bank, did unlawfully and knowingly make and cause to be made, false entries in a report and statement of the condition and assets and liabilities of said Metropolitan National bank at the close of business December 7, 1887.

De Camp plead not gullty before Commis sioner Dorger, and John Carlisie and Albert Netter signed his bond for \$20,000,

A meeting of the bank directors was called The board went into executive session. They were in session half an hour, and then the following resolution, offered by Director Rvan, was adopted:

"WHEREAS, Every effort has been made by the board of directors of this bank to keep up the credit of the institutiou; and

"WHEREAS, We find that it is impossible to sustain it longer without serious detriment to the best interests of depositors and stockholders; therefore be it

"RESOLVED, That the business of the bank he suspended for the present, and that the doors be not opened for business on Tuesday, February 7.1

Ex-Mayor William Means, president of the bank, understanding there was a warrant out for him, appeared at District Attorney Burnet's office shortly after noon and voluntarily gave himseif up. It is understood he is charged with signing the statement of December 10, 1887, sent to the comptrolier, purporting to be a true statement of the condition of the affairs of the bank.

Means is also charged withe the misappro priation of \$234,288 of the funds of the bank by loans to himself between January 1, 1857, and February 5, 1888.

He was arrainged before United States Commissioner Dorger, and his bond is placed at \$20,000. His bondsmen are Henry Hanna, May Fechheimer, P. E. Roach and C. M. Holloway. He waived examination and his bond makes him auswerable to the grand

Commissioner Hooper this morning issued a warrant for the arrest of Officer George Honeyman, watchman of the Metropolitan bank. The charge was resisting an officer. He was held in \$1,000, but was allowed to go on his own recognizance,

The condition of the Metropoiitan bank is said to have been bad for over a year. The direct cause of its failure is due to the speculation in real estate and other schemes. When the real estate fever broke out about a year ago, a syndicate, it is claimed, wasformed among the directors of the Metro polltan National bank. Those said to have been in it were President William Means, Vice President John R. De Camp, Directors George K. Duckworth, Gerke and Ed. Roth, and they went into the real estate boom just as it was at its height. Over \$48,000 was used in purchasing Coney Island stock, Findlay gas land, Toledo natural gas stock, Roane Mountain, Tenn., iron and coal land and stock in the Athens, Ga., Improvement company was purchased. Most of the land and stock was bought on time, notes being given. When the boom ended and these notes matured it is charged that the bank's money was used to pay them.

ANOTHER CINCINNATI BANK A VICTIM

OF SPECULATION.

This, it is alieged, was accomplished by one director loaning the bank's money to the other on notes. These amounted to over \$600,000. National bank examiners went through the bank numerous times, and The Metropolitan National Goes Under always reported it solvent. When the After a Desperate Struggle—The Pres- Fidelity bank failed it was discovered that there was something wrong with the Metro-politan. It seems that on March 17, Bank Examiner Powell arrived in this city for the purpose of examining the Fidelity National bank. It was at the time Harper and Hop-kins were in the wheat deal. When Poweil began his examination, the reserve fund, which the law requires to be 25 per cent, of the deposits, was away below that amount.

To dupe the examiner, Harper borrowed \$150,000 from the Metropolltan bank. This was enough to balance the reserve fund, and Examiner Poweil reported that the Fidelity was solvent. This money was returned to the Metropolitan the next day. This peculiar transaction was not known, however, when the Fidelity failed. Examiner Powell appointed John R. De Camp, vice president of the Metropolitan, temporary receiver of the Fidelity. The Fidelity failure caused a run on all the banks.

Vice President De Camp knew that his own bank, the Metropolitan, was hard pushed. To save his institution It is charged that he took ail the biiis receivable of the Fidelity bank and collected from the New York banks \$175,000. This amount he turned over to the Metropolitan to meet the demands for money from the depositors. When Receiver Armstrong took charge of the Fidelity's affairs he demanded the money, and the Metropolitan paid over \$115,000 to the receiver, which in turn was sent to Comptroller of the Currency Trenholm. During the trial the peculiar transaction of transferring the funds of the Metropolitan to the Fidelity came out. This caused Comptroller Trenholm to look upon the Metropolitan with suspicion. He examined old statements of the bank, and saw upon the face of them

that there was something wrong.

A new bank examiner, Mr. Sanders, was then sent to Cincinnati. The very first day he was in the bank he found that it was not solvent. The last statement showed the reserve fund to be 25 per cent, of the deposits, Instead of this amount he found there was not 10 per cent. on hand. He next discovered the fact that there was a syndicate among the directors for speculating in real estate. He demanded that the directors, whose unsecured notes were in the bank, replace them with soild cash. This was done by some of the directors, while others turned

in real estate stock, etc. Mr. Sanders looked upon the stock with suspicion. He remained in the bank over a week. This caused suspicion. Metropolitan stock dropped from 145 to seventy-nine cents. This caused a run on the bank Saturday.

Then came the resignation of the vice president John R. De Camp, which was demanded by the examiner. This caused the run on the bank Monday.

Mr. De Camp's arrest convinced the directors that further efforts to sustain the bank would prove futile. Clty Treasurer Bohrer had \$100,000 in the

Stockholders will realize 86 on their stock. Examiner Sanders and his aid, Mr. Wiiiiam Moffett, at once took charge of the bank.

They will continue in charge until a receiver is appointed. A rumor is current on Third street to the effect that the Metropolitan will reorganize

in a few days, reduce the capital stock, pay all the claims and continue business.

History of the Bank. CINCINNATI, Feb. 7.-The Metropolitan of the past year., The committee on creden-National bank was the outgrowth of the old private banking house of J. F. Larkin & Company. It was organized on January 15, 1881. J. F. Larkin was elected president and J. R. De Camp vice president. The capital stock was \$500,000, and the bank was located in a modest apartment on the south side of streets. It is said the bank did a large business until the capital stock was increased.

In February, 1882, Hon. William Means was elected president to succeed Larkin. A number of changes also took piace in the directory. Of the original board of directors only two, E. N. Roth and J. R. De Camp, were in the bank at the time of the suspension. In July, 1886, the Metropolitan branched out into its new and elegant quarters in the United bank building, at Third and Walnut streets. No bank in the country has more handsome or convenient apartments. The building is very imposing from the outside, while within the work is of the finest description. The interior is of mahogany, while the wood work carving is very artistic.

The bank fixtures are of the costilest and most modern patterns, and all the offices are admirably arranged. The vaults of the bank are the best in the west, both as to construction, safety and appearance. The lower vault is burglar-proof, and both vnults can withstand fire or attack of any kind. Both vaults are secured by Yale time-locks, and the bolt works are of the most massive

Boston, Mass., Feb. 7.—The dismissal of its pastor for smoking shows that the town of Mendou, though 250 years old, hasn't changed since the Pilgrims founded it. Rev. Mr. Wassail did not get enough happiness out of his saiary of \$350 a year, so he sought solace in the pipe. Some body discovered him in this wicked practice and his shocked parishoners forthwith decided not to hire him any more. His fall from grace also loses him a gratuity of \$200 a year and free house rent.

## ROUGH ON WORKMEN.

THE EFFECTS THE PROPOSED RUB-BER TRUST WILL HAVE.

Thousands of Workmen Will Re Thrown Out of Work-The Reading Situation. The Auditorium Boycott a Small Affair. Miners' Interstate Convention.

NEW YORK, Feb. 7.—The formation of the great proposed rubber trust is now a question of only a few days. The committee appointed to settle the differences between Christopher Meyer and the others regarding the New Jersey manufactories has effected a compromise and will propose a pian of organization at a meeting to be held within two or three days. By this plan all manufacturers of rubber goods who wish to join the trust will pool their own stock and turn It over to the central company in exchange for certified shares of the trust in proportionate value.

Those concerns which can manufacture rubber goods at the lowest rates will be continued in operation, while the others will thut down. These different factories kept in operation, will make different grades of goods, with the result of making more goods with less labor and a much smaller cost. Instead of 8 and 9 per cent. profit, as at present, the firms interested will then be able to reaiize over 15 per cent, profit annually,

The formation of this trust will have three great results. The profits for the consumers will become higher, and several thousand workmen will be thrown out of employment, without any other resources to fall back upon. The combine involves a working capital of \$50,000,000, and an annual trade of \$100,000,000.

The Reading Strike.

POTTSVILLE, Pa., Feb. 7.—Everything is quiet at Shenandoah to-day. The Reading company made no effort to start any of its coilieries there. The police and sheriff's posse are still on duty. William Penn colliery took on additional men and is now working fuil handed again. The company still continue their effort to keep running about a dozen of the best collieries, but the force of men increases slowly.

The strikers to-day show no signs of weakening, as the endorsement of the general exscutive board has given them new strength. The employes of Quinn's colliery at St. Clair, shipping over the Pennsylvania road, struck this morning for an advance. They have been working along at the old rate of

The strike leaders say that the Wyoming region is suro to strike if the 15 per cent. advance is not granted. Miners' Interstate Convention. PITTSBURG, Pa., Feb. 7.—At 11 o'clock this morning 400 miners and operators, delegates to the interstate convention, were present in Old City hail, when Col. S. M. Yeoman, of Indiana, called the convention to order and delivered a brief address, congratulating the convention on the harmony and prosperity

tials was then selected. But two operators were present from Illinois, who declined to be recognized as delegates, as they represented but one district. President Townsend, of the Indiana state board of arbitration and conciliation. announced that the Illinois operators had Third street between Walnut and Vine officially declined, to participate in the convention, and would not consider themselves bound by Its action. A motion to give ail from Iliinois a seat and a vote was lost. The convention adjourned until this evening.

Early in the day the operators met in secret session in a parior at the Manongahela house, At this meeting the Indiana operators bitterly opposed the methods of the Knights of Labor. With them one stated: "It is not so much a ! question of wages in our state as it is whether the operators or employes shall be allowed to run the mines."

The operators finally determined to move for a scale, the basis of which shall preserve the present relative rates in the different

The Auditorium Hoycott.

CHICAGO, Feb. 7.—The attempt to make an issue of the employment of non-union men and the use of material manufactured by non-union workmen on the new Auditorlum building, is confined to a very small faction of organized labor. An obscure assembly of the Knights of Labor passed a resolution to the effect that any candidates nominated by any convention held in that building be boycotted by organized labor. This resolution was passed by Local Assembly No. 6,303. An attempt will be made to force a similar resolution through the central organizations, but it is said that the plan will amount to littie.

Cutting Freight Rates.

The action of the Central will undoubtedly precipitate a rate war among the local lines contiguous to the Central in Wisconsin.

WRECKED ON THE COAST.

Twenty Lives Lost Near Gray's Harbon Washington Territory.

SAN FRANCISCO, Feb. 7.—According to news received to-day a vessel, supposed to be the British Iron bark Abercorn, was wrecked on the coast near Gray's Harbor, Washington Territory, on the night of February 1, and all on board but two seamen and an apprentice were lost, about twenty perish-

The vessel arrived off the Columbia river February 1, but was unable to get over the breakers at the bar. She put to sea, and was caught and driven north by the gaie unth she went on the rocks at the point named. The extreme roughness of the sea prevented any assistance, and the officers and crew with the three exceptions noted, perished la their attempts to reach shore. The Abercorn was iron ore iaden from Maryport, England, for Portland, Oregon. She was an iron vessel, valued with cargo at \$120,000. The captain was named McCullom.

Rescued From a Sinking Vessel.

NEW YORK, Feb. 7.-The ship Larnisia, which arrived yesterday, brought the crew of nine men of the German bark Jasen, who were rescued on New Year's eve off the Azores from the sinking Jasen. They had been thirty-five days at the pumps and the water was constantly gaining. They would soon have perished, as they were nearly exhausted with work and starvation.

St. Louis Thinks She's Struck Oil.

St. Louis, Feb. 7.—White boring an artesian well at Grones Brothers' brewery, on Ciark avenue and Twenty-second street, a few days ago, an oily substance was noticed on the water that was met at a depth of 700 feet. The boring was continued and at a depth of 1,100 feet the oil was found in considerable quantities. Tests proved it to be crude petroleum. A pump has been at work for several days and, though a very imperfect experiment, brings up about two barrels of oil a day, mixed with large quantities of water. Quite a strong odor of gas accompanies the stream, and at times a heavy pressure is generated. The well will be bored deeper and more perfect tests made with a view to development.

Died in Jail.

TERRE HAUTE, Ind., Feb. 7.—Lying on the stone floor of a cell in the county jail yesterday morning was Josephine Barton, a glri of twenty, coid in death. She died late at night. Her coming to this city is wrapped in mystery, hut enough is known of her that her parents live in Perth, in Clay county. She was admitted to St. Anthony's hospital the early part of last week, and Friday night was removed to jail, as it was thought she was attacked with insanity. It is said that the girl came here to have a criminal operation performed on her, and that her sickness was due to its effects. Her parents at Perth have been notified,

The Democratic National Convention. WASHINGTON, Feb. 7.—The San Francisco contingent are here laying their plans for a hard fight with a view of capturing the Democratic National convention and will doubtless agree to pay all the expenses of the delegates, provided their city is selected. The more conservative politicians are of opinion that the chance will be either Chicago, St. Louis or Cincinnati, and that the fight for New York will be practically abandoned prior to the 22d. New Yorkers will not listen to such arguments, however, and claim that their chances are growing stronger rather than diminishing.

Wife Murder and Suicide.

PITTSBURG, Feb. 7.-At 7:40 o'clock this morning Peter O'Neili, residing with his family at the corner of Thirty-first and Smallmen streets, shot and instantly killed his wife, the bullet passing through her heart. He then turned the weapon upon himseif, and fired a built into his head inflicting fatal injuries. The cause of the deed was jealousy. Five children, the eldest a boy aged sixteen, are parentless. O'Neill had been steadily employed at Clark & Company's Solar iron works, prior to the strike.

Kansas Town to be Abandoned,

MERTILTO, Kas., Feb. 7.—The people of this place have determined to locate elsewhere. The town is ten miles from West Plains, and, owing to the policies adopted by the railroad, is entirely at the mercy of its rivals. Suturday two general stores, one hotel, one grocery store, one livery stable and the local newspaper loaded their goods and chatties on wagons and box cars and moved to West Plains to continue the struggle for existence among so many rival Kansas towns.

### That Hibernian Hop.

One of the most enjoyable events of the season was the Hibernian hop which took place at the Neptune Hall, this city, on Thursday evening. February 2nd. There were at least 300 people present. Young and old attended. The babies were there as well as the old man. One young man was noticed who was a little bashful about dancing, but was particularly fond of nursing the baby while the mother "tripped the light fantastic toe." All present seemed to enjoy themselves hugely, and on the next day could be seen a smile on the countenance of those who had been present, as though all went happy with them the previous night. Especially was this the case with the members of the A. O. H. and well they should smile as their not receipts amounted to \$85.00, a nice round sum to make on such an occasion.

At last Monday night's meeting there was passed a vote of sincere thanks to all who aided; to committee on arrange-ments: J. T. Short, T. J. Curley, James 8. Redmond and Jne. Fitzgerald, who knew their business and acted so admirably well; also to the floor managers, W. T. Cummins Wm. Conley, James Dunn, Jno. O'Keefe, James Daley, James Downey and Jno. Malioney, who were so polite and ever ready to see that all present should enjey themseves; and to Mr. Wm. Driscoll who had the hall so neatly decorated and floor waxed to perfection, and to the society in general as they all acted so admirably well.

The Hibernian ball shall long be remembered.

His art consists In kneading all the museles of the body and bringing them into play, and he is reticed not only by men, but also by women, and at almost every inn where I have stopped among the first persons to proffer In the Wolfe Circuit Court n fellow has their services have been the names. Only allow my body to be treated like a piece of dough, and that was at Subasbirt, Immediately after my descent from Fnji. gestion of Dr. Knipplng that it might be In 1880 there were 179 cotton mills in well to allow an amma to shampon us

> The particular amma who came to our room and shampooed us was an ungainly and awfully ugly woman of middle age, whose blackened teeth when she smilled looked like a row of watermelon seeds set in her face. During the process I had an opportunity to question her fully as to the business, and learned from her quite a number of luteresting facts. She informed us that before commencing the practice of . apprenticeship of three years, during which time she read a large number of Japanese books teaching of the human body, and especially the muscles, and had become learned in anatomy and physlology. She had practiced the massage for ten years already, and had by means of it gained her livelihood. She stated that she was able in one evening, from 6 to 10, to treat four persons, who paid her a fee of fifteen sen apiece. Her daily earnlings were, however, not more than thirty sen on an average, or about twenty-four cents of American currency.

In the operation of shampoolng, as practiced by the amma, the patient lies upon a faton or rug, while the amma kneels beside hlm. The first act in the drama deals with the abdominal cavity. Placing one hand on either side of the thdomen, above the hips, the annua compresses the body laterally a number of times, then drawing up the loose folds of ilesh, he kneads and plnehes them, at the ame time making passes which correspond in their direction with that of the colon. This portion of the treatment ended, each leg is attacked and vigorously rubbed and kneaded, the process terminating by a smart bastinade administered to the soles of the feet.

In rubbing and kneading the muscles use is made of a round ball of boxwood, though the amma to whose treatment I submitted employed only her fingers and knuckles. The arms and chest are treated us the legs, and then the patient is turned over face downward, and the shoulders and back are punched and knewded until the breath almost forsakes the body. The entire performance ends with a vigorous rubbing of the neck, which, in my case, seemed to threaten the dislocation of the cervical vertebræ. The amount of strength in fingers and wrists displayed by the amma is quite remarkable. Our amma shampooed four persons in successlon the evening we engaged her, consuming four hours in the cask, during which she was working with all her might almost constantly, only stopping to wipe off the perspiration which flowed from her

The result of the experiment, so far as l personally was concerned, was, I think, such as to warrant the repetition of the treatment under like circumstances. awoke on the morrow feeling far less tired and sore than I had reason to believe my

mountain climbing would have left me. The art of the amma appears likely to live for a long time in Japan, as it is in some respects founded upon rational princlples. This is not, however, the case with the medical practitioner of the old Chlnese school, whose practice is swiftly and surely dwindling away as the merits of western medical theory and practice are becoming more and more recognized. The old style of practitioner, with his nostrums and enchantments, his mixtures of villainous herbs and minerals, his powders made of dried snake skins and bird dung, is still in the numerical majority when a census of the medical practitioners of Japan is taken, but the young men, graduates of the university at Tokio, are rapidly absorbing the entire practice among the wealthler and more intelligent slasses. The medical department at the Imperial university at Tokio is under the imperial university at Tokio is under the eare of German professors, men of thorough ability and experience, and the results schieved during later years have been most marked and most beneficial to the country as a whole. It is the feeling of not a few Europeans resident in Japan that, while always preferring the services of a European or Amerions practitioner, the graduate of the univessity at Tokie may generally be trusted to treat a patient carefully and well.— Cor. Miss Shuthuck Peacefully Passes Away and a Bruefit Fund Being Ratsed.

NORFOLK, Neb., Feb. 7. - Miss' Louise Royce, a school tencher, three of whose plupils died in her arms during the recent blizzard, will lose both feet and a portion of one nrm as the result of exposure in the blizzard. Nearly \$4,000 has niready been contributed to the benifft fund for the teachers, Mlss Freeman, Miss Royce and Miss Shattuck, who lost both her lower limbs. Over \$3,000 of As I am sitting in my room there comes | this amount goes to Miss Shattnek. Indications are that this fund will reach between \$8,000 and \$10,000 within the next ten days.

LATEA-This morning Miss Shattuck, the young school teacher, who, during the late bilzzard lay in a hay stack seventy-eight hours, being so badly frozen as to necessitate the amputation of both legs below the knees, was suddenly taken worse and at 9 o'clock passed peacefully away. Her death was not wholly unexpected, as she has been decidedly feeble during the last few days,

### Damper on Chleaga's Prospects.

CHICAGO, Feb. 7.-Professor John E. Siebel, an analytical chemist and geologist of this city, in an interview, said he had found by investigation that the chances for discovering natural gas in available quantities and under a valumble pressure in the Trenton limestone formation beneath Chicago are very siim indeed. He maintalns that Chieago is in a pocket, that is to say: The city overlies a depression in the limestone, and natural gas can be obtained only from synclinals of that rock. The gas may be found in good pressure, he thinks, fifty miles east or lifty miles west of Chicago,

AN EXTREMELY LIVELY MEETING EX-PECTED NEXT THURSDAY.

With Many of His Lieutenants in Prison l'arnell's Lot le a Hard One-Rumors Concerning Sir Michael Hicks-Beach. A Spanls Duel Probable-Notes.

LONDON, Feb. 7.—The meeting of Irish members called by Mr. Parnell on Thursday morning is expected to extremely lively, as It is known that several of the leading Home Rulers are opposed to the policy of nonobstruction advised by their chief, and the open revolt of those members would surprise nobody.

It is bad enough, it is argued, to bear the humiliation imposed by the arbitrary procedure of the majority, but infinitely worse, Russian loan of 30,000,000 roubles. to be compelled to make no show of resistance to the injustices the party in power will never cease to heap upon the heads of Irish members as long as there may be heads bowed to receive them, and doubt is expressed that Mr. Parnell can hold his forces together upon the lines he has laid down.

With many of his most valued lieutenants languishing in Irish jails and others likely to rifles Into repeaters with all possible diswhere their lot before the session is well patch, under way, Mr. Parnell can ill afford to And insist upon the absolute adherence of his followers to a policy with which they are not unanimously in accord or which they are not father. at least willing to observe for the sake of

barmony. Who believes that Mr. O'Brien or Mr. Sullivan can reconcile himself to a policy of passive submission or lukewarm opposition to a further increase in the harshness of rules expressly made to humillate and repress the Irish representatives in the house of commons, and deprive the Irish people of their rightful share in the proceedings of the lmperial legislature? Who also expects that the brothers Healy, the flery Tim and the peppery Maurice, and Dr. Tanner to observe a policy of non-obstruction?

If Mr. Parnell shall succeed in bending these spirits to his will in this matter he will have to use stronger and more plausible arguments in favor of his plan than any he has Bolivar, N. Y. Mrs. Hill and two small yet advanced and will stamp himself the children perished in the flames. The house most consummate governor of men of the was heated by natural gas direct from the century.

Activity in English Politics.

LONDON, Feb. 7.-In the interest which Prince Bismarck's speech in the reichstag has excited here, the activity incident to the near approach of a session of parliament is for the moment lost sight of, but the utmost activity prevails among all polltical parties and sections, nevertheless

The periodical production called the queen's speech is finished and has received her majesty's approval, and the ministerial program for applying the gag to the Parnellites and Liberals and the party lash to lukewarm Tories is finally formulated and awaiting the fall of the speaker's gavel when it will go into active operation.

Ireland's Secretaryship.

LONDON, Feb. 7.-The rumor is again revived that Sir Michael Hicks-Beach will shortly resume the Irish secretaryship, despite his asseveration in a speech at Bristol, last night, that he had no wish to do so.

The credence given to the rumor strengthened by the general belief that Mr. Balfour, having got himself throughly detested and being constantly harassed by the fear of personal injury, would gladiy give could be made to an pear that he was running away and Beach's return would be less likely to create that impression that the appointment to the offlee of any other man.

Germany Ready to Back Blamarck. BERLIN, Feb. 7 .- Bismarck carried the reichstag for the army bill without a dissenting vote. The appropriations asked were given with an alacrity that was surprising. Germany stands united with the Iron Chancellor, ready to back him in extreme measwres if necessary.

"We Germans fear God, but nothing else in the worldi" was the significant remark of the chancellor in closing his great speech. Germany now appears in the attitude of pro-claiming peace while prepared for war.

French Press Comments.

Paris, Feb. 7.-The Journal Des Debats, La Paix and Si Siecle, Republican, all contain comments on Prince Bismarck's speech and agree in crediting the German chancellor with pacific intentions.

The Radical press discuss the speech at length and unite in demanding that a defensive alliance be at once entered into against the unscrupulous Teuton.

Harry Perkins in Court.

LIVERPOOL, Feb. 7.-Harry Perkins was arraigned on the charge of stealing jewelry from Frederick Cutler, of Boston. He pleaded not guilty. He was remanded for one week at the request of the United States consul, who is waiting for documents from

"Vive Bonlanger."

PARIS, Feb. 7.—Gen. Boulanger attended a performance at the Theater Du Chatelet last night, and was greeted with tremendous shouts of "Vive Boulanger," both in the theater and on the streets.
